

Script 1: Timer displayed on the screen

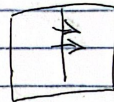

time + delta.time

Derivation of time

Use GetComponent to display

Script 2: Trigger (Scale slider)

If player drags the slider on the left

To the left: bullet ~~smaller~~ smaller

To the right: bullet bigger

prefab

Script 3: cannon (Drive slider) (Fire button)

When player drags the very bottom slider

↳ The object "cannon" will move with the Drive slider.

if the player click [Fire button]

↳ Generate a prefab. ~~at~~ on position of cannon

prefab, move ~~upwards~~

if it touches the upper edge

↳ destroy it
